

Portfolio Website

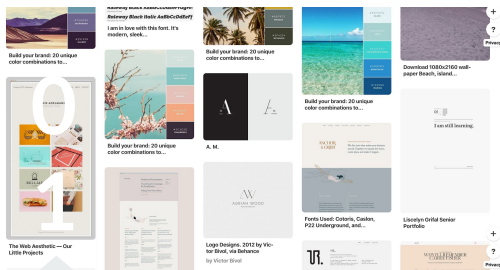

By Natasha Khatri

Portfolio Demo

Process

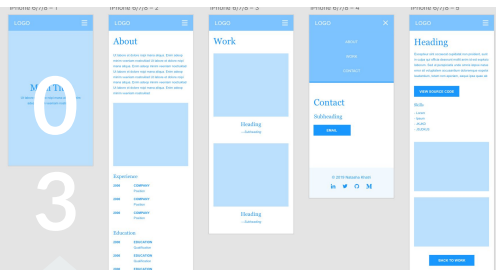

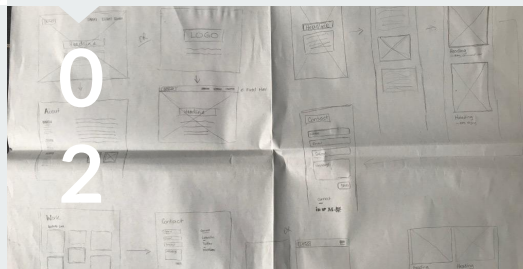

Brainstorm ideas

Worked on moodboard, colour palette, look and feel.

Sketched initial layouts

Roughly sketched initial layout for pages based on examples that I found online and features that I liked.

Created wireframes

Created wireframes to show basic layout of each section/page for both mobile and desktop screens.

Challenges

1

Navigation menu - trying to make it responsive with the hamburger feature without using javascript.

2

Using Flexbox correctly to layout sections for responsive design.

3

Trying to come up with a colour scheme and personal logo.

4

Coming up with initial layout of the website - took a day to finalise.

Favourite Parts

1

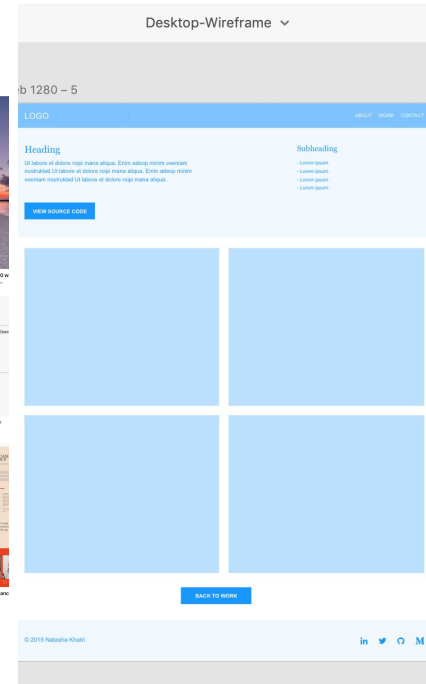

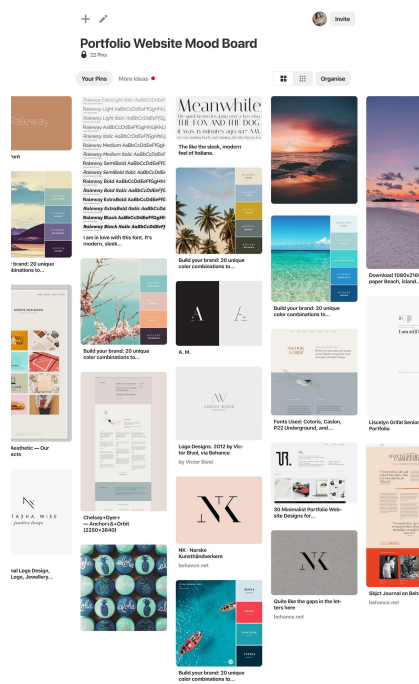

Researching and looking at all the designs being used.

2

Drawing the wireframes after getting the sketches finalised.

3

Trying to come up with a personal logo.
